

Enphase Energy – Bangalore, India.

Role: Associate Software Engineer – DBU

Number of rounds:

Enphase Energy conducted a one-day campus drive where they had 3 rounds of interviews (1 Technical + 2 HR Rounds).

Technical Round:

Following the Resume Screening Process, I was shortlisted for the Technical round where I was given coding exercises and was asked questions on OOPS Concepts, Data Structures, DB, and Web/Mobile App Development.

HR:

Subsequently, I was shortlisted for the next round with the HR. This round completely revolved around my resume and the projects I had done during college. Finally, I had a one-on-one session with the Vice President and Managing Director of Enphase Energy - India, where he talked about my role at the company, and also gave me an insight into the company's work culture and campus life.

After 2 days when I finally got my offer, I was super elated. The placement experience on the whole was truly exhilarating and I am looking forward to working with the team.

Hope this helps..Thank you and All the Best!!.
