

VISA INTERVIEW EXPERIENCE

HARISH G S

2023503525

B.E - CSE

MIT Campus.

◆ Online Assessment (CodeSignal):

The OA consisted of 4 problem-solving questions.

- 1) Time Machine Travel – Calculate total time required when traveling across years with specific forward/backward rules.
- 2) Octavian Lunar Phases – Determine the lunar phase on a given date with cyclic phases.
- 3) Library Book Circulation – Simulate library operations like acquisition, checkout, and reclassification of books.
- 4) Lamp Illumination – Find the coordinate illuminated by the maximum number of lamps.

✓ I was able to solve 3 problems completely and partially solved the 4th (40/100 test cases).

◆ Technical Interview:

The interview was held for 1 hour in Microsoft Teams. Started with my introduction, where I mentioned solving 100+ problems on LeetCode. So, he gave me some questions in linked list and trees.

DSA (pair coding in CodeSignal):

- 1) Floyd's algorithm
- 2) DFS in a tree to find depth.
- 3) Difference between Tree and Graph.

DBMS:

- 1)Query to find top 3 students by marks from CSE department with department name.
- 2)Two-phase locking.
- 3)Hashing and role of B-Tree.

Computer Networks:

- 1)What is an IP Address?
- 2)Difference between UDP and TCP

Operating Systems:

Initially I told that I'm studying it in this current semester. So, he asked me to explain deadlocks as it is same as in DBMS.

Projects:

Explained 2 of 3 projects — one in AI/ML and another Full Stack project.

◆ **HR Round:**

- 1)How do you handle stress?
- 2)Where do you see yourself in the next 5 years?
- 3)What were the challenges you faced as a class representative?
- 4)How would your classmates and staff describe you?
- 5)How do you deal with the pressure situations?
- 6)Then he enquired me whether do you have any questions to ask me. So, I asked "How does Visa generate revenue?" and received a polite and insightful answer.

◆ **Tips:**

- Be confident and productive during the interview as your activeness shows your attention.
- Speak casually and genuinely with the interviewer and try to answer all the questions instead of being silent.

- Practice basic and intermediate DSA problems in leetcode.
- Gather the concepts of DBMS and OOPS from chatgpt.
- Go through your projects completely.
- Be thorough with your resume (including each point).
