CSE batch of 2026, CEG

About the company

Ramco Systems Limited is an Indian multinational enterprise software product and platform provider disrupting the market with its multi-tenant cloud and mobile-based enterprise solutions in Global Payroll, ERP, and M&E MRO for Aviation. Founded in 1997, it is a part of Ramco Group, and is headquartered in Chennai, Tamil Nadu.

No of Rounds: 4 (Online Test + Pen and Paper Test + Technical interview - 1 + Technical interview - 2)

Round 1 – Online Assessment

The online assessment was conducted on the DoSelect platform with total duration of 1hr 15 mins. Total number of questions are 26 in which first 2 were coding questions. Remaining 24 questions are Multiple choice from the topics like basic understanding of C Language, Operating system, DBMS, Linux commands.

From online test, 73 candidates were selected for the pen and paper assessment the next day at CUIC.

Round 2 – Pen and Paper Test

In this round, all the candidates were given a question papers consisting of 3 coding questions. We can write codes in our preferable language within 1 ½ hrs time limit. The 3 coding questions asked (from LEETCODE) are:

- [Longest Harmonious Subsequence](#).
- [Longest Substring Without Repeating Characters](#).
- [Find Duplicate Subtrees](#).

From this round, 42 candidates were selected for the 1st level of Technical Interview.

This test was conducted in person at CUIC.

Round 3 – Technical Interview 1

It took place in person at CUIC. It went for about one hour.

The interviewer asked my resume and asked me to introduce myself. Then he went through my resume thoroughly.

- Project
- DSA – [Rotate List](#), Dijkstra's Algorithm

- DBMS – Normalization and Denormalization, SQL queries (Sub query/Join, Limit Offset), Deadlock in DBMS
- OOPS – Polymorphism & types
- OSI Layers – TCP and UDP difference
- React – Lifecycle components, Redux, useMemo (as I mentioned in resume)
- Error vs Exception

From this round, 42 candidates were selected for the 1st level of Technical Interview.

Round 4 – Technical Interview 2

The interviewer asked my resume and asked me to introduce myself. This round went for One and a half hours. I was able to solve only one DSA problem in the entire interview since I hadn't solved this problem before.

Gas Station

I tried multiple solutions and finally I arrived correct solution.

After this final round, **10 candidates** were selected.

Previous Interview Experience

In my previous interview at Optum and Athenahealth, helped me reach the last round. However, I was rejected due to weak theoretical knowledge. This taught me the importance of balancing DSA preparation with theory subjects.

For future candidates, I would suggest being well-prepared with your self-introduction, internship experiences (if any), and project details. Communicate with clarity and confidence. Even if you don't know the answer to a question, stay calm, as interviewers often guide you toward the right direction. Consistent preparation and strong core concepts are key. This was my sixth interview in placements alone, and my continuous efforts helped me succeed here. Don't be discouraged if you're not selected—the right opportunity will come your way. Wishing you all the best!

If you have any further questions, feel free to reach out to me
