

SAP Labs

About the company :

SAP stands for Systems, Applications, and Products in Data Processing .Originally known for leadership in enterprise resource planning (ERP) software, SAP has evolved to become a market leader in end-to-end enterprise application software, database, analytics, intelligent technologies, and experience management. A top cloud company with 200 million users worldwide, SAP helps businesses of all sizes and in all industries to operate profitably, adapt continuously, and achieve their purpose.

SAP Labs India drives SAP's product strategy and is responsible for SAP core solutions and provides product localization and India specific solutions.

Online Coding Round

Number of questions : 2 coding + 10 mcqs

Duration : 1 hr

Platform : Hackerrank

Programming questions

- 1) Given a string and a wildcard pattern, find if the wildcard pattern matches with the string.
- 2) Substring manipulations.

Note : Few were asked to code java based programming questions

Multiple choice questions (10) : Basic questions on data structures and algorithms.

15 students were short listed for the next round. (Those who solved both the programming questions)

Technical Round I [Pair coding round]

Number of questions : 1

Duration : 45 minutes

Platform : Hackerrank codepair(Interviewer was on the other side and the online IDE was screenshared)

Programming question : [Dynamic Programming]

Given a rod of length n inches and an array of prices that contains prices of all pieces of size smaller than n. Determine the maximum value obtainable by cutting up the rod and selling the pieces.

Discussed about few of my projects mentioned in the resume.

Take aways :

- Be interactive with the interviewer while coding
- Voice out your approaches and logic.

- Keep trying various approaches until you find the right one
- Don't hesitate to ask for help from the interviewers.

Technical Round II

Duration : 30 minutes

Platform : Microsoft Teams

This round was purely based on my resume.

Questions on my projects : (I mentioned 3-4 academic projects)

- Technology used in each of the project and the reason behind me choosing that particular framework or language.
- Questioned if I had deployed any of these projects.
- Asked few security related questions from the project
- Was asked to explain the table structure and their relationships used in the database projects.

Questions on the skill set mentioned in my resume:

- What is Git and Github ? List few Git commands
- Advantages of python.
- Difference between python and other programming languages.
- List the unique features of Django. Was asked to write a small code snippet
- Discussed few tags in html and css.
- What is CNN and explain it in detail?
- Basic questions on datastructures, operating systems ,networks

Managerial Round I

Duration : 30 minutes

Platform : Microsoft Teams

No of interviewers : 2

- Asked few scenario based questions. (Eg : The IRTC tatkal ticket booking server has crashed. What are the steps that you would take to resolve as a developer and how would you convince the customer?)
- Explain the stages in product development. Which stage would you prefer to work in and why?
- Which programming language you are strong at and why do you prefer it?
- Why have you not done any internships?
- Would you prefer going for higher studies?
- How do you balance both studies and extra-curricular activities?
- Why the technology/language used in each of your projects is totally different?
- What is your dream company?
- Surfing through my linkedin profile and questioned my interests

(4 students were shortlisted for next round)

Managerial Round II

Duration : 15 minutes

Platform : Microsoft Teams

- What are your strengths and weakness?
- Who is your role model and why?
- How do you manage stress ?
- Who is your supporter and motivator? How do they motivate you?
- The quality that you admire the most from your friend?
- Why did you choose engineering and specifically why computer science?
- Why SAP Labs?

(3 students were shortlisted for the next round)

HR round

Duration : 15 minutes

Platform : Microsoft Teams

This was just like a friendly discussion with the interviewer. I was asked to introduce myself. Then, I was asked to describe my college life, my daily routine. Discussed my interests apart from academics and the latest movies I have watched. Was asked to narrate my experience about this virtual hiring process. Finally asked, if I had any questions for the interviewer.(It was asked in all the rounds)

(2 of us got selected from the overall hiring process.)

Be confident on what you speak.

Never take any opportunity for granted!! Give your best ;)
