

ROCHE SERVICE AND SOLUTIONS – INTERVIEW EXPERIENCE

About The Company:

Roche Services & Solutions (RSS) is part of Roche, a Swiss-based global leader in pharmaceuticals and diagnostics headquartered in Basel. With main hubs in **Budapest, San José, and Kuala Lumpur**, RSS provides 24/7 customer-centric services in areas like finance, IT, procurement, and people support, enabling Roche to focus on its mission of delivering innovative healthcare and personalised solutions that improve patients' lives worldwide.

Role: Data analyst/Data scientist / Data engineer (that will be confirmed after internship)

CTC: 8.25 LPA

Type: Intern+FTE

RECRUITMENT PROCESS:

1. Online Test
2. Case Study
3. Group Discussion
4. Techno managerial round
5. Techno HR Round

Online Test:

- 3 Sections - MCQ
- Section 1: Aptitude, English, Logical Reasoning
- Section 2: Pandas, SQL query, Excel
- Section 3: SQL Query
- Out of so many departments attempted, **54** were shortlisted.

Case study:

- Given a set of business kind of scenario
- Asked 5 questions with each carrying marks like 5,10,15.
- We are asked to write solution for the questions (analytics kind of questions)
- Only **16** people is shortlisted to next round.
- For me, I felt these questions as moderate – hard.

Group Discussion:

- 16 people are divided into two, one is given a topic “AI is a Threat to Employment”
- Other people have to give points against it
- This is non eliminatory round
- This went really good and we had a good convo with the company people too.

Techno Managerial Round:

- Introduced myself
- They asked me these questions:
 1. How was your day?
 2. How did u feel about the case study? Did u feel anything difficult?
 3. What do you think we (Roche) do?
 4. What is your opinion about our recruitment process since you told this is your first Group Discussion?
 5. What are the clubs you are a part of?
 6. What did u do in NSS?
 7. Apart from NSS what are the various other clubs?
 8. Explain bubble sort and its code? (I have written the code in c++)
 9. How do u solve a conflict with your co-worker?
 10. He described a scenario and asked me to solve this using query(sql query)? (basic joins, aggregation)
 11. What is class and objects?
 12. Asked an **analytical question**:
 - How would you arrange water bottle for your college symposium?
 - If no data given, how would u estimate the number of water bottles?
 13. Asked questions in the case study. Like explain the approach, why did u do like that?
 14. My turn to ask questions:
 - What kind of practice or internship we undergo during the internship?
 - What actually Roche do with IT people?
 - I asked about my review.
 15. Out of 16, only **7** were shortlisted.

Techno HR Round:

- Introduced Myself
- They asked me these questions:
 1. How did u feel now after completing all these rounds?
 2. What do u know about Roche?
 3. What is window functions(dbms)?
 4. Same questions like clubs and the activities.
 5. Palindrome code in python.
 6. Queries using joins, aggregate functions, window functions.
 7. Asked a **guestimation** Question:
 - If you are asked to build a airline company in an city, what are things you consider
 - I took some time and told them – per capita income of each person, the city 's fame(like college, business, tourist attractive place)
 - He pushed me to get that one answer but I could not arrive at the thing he expected.

8. Explaining the projects (**clear and complete view of a project is expected**)
9. Asked me a puzzle: <https://www.geeksforgeeks.org/aptitude/puzzle-bag-of-coins/>
10. I did one question wrong in the case study because I don't understand the business terms, the he explained me the terms and their meaning and asked me solve this time. I answered it correctly
11. Asked me the data processing pipeline.
12. My turn to ask questions:
 - I asked the interviewer about their experience in ROCHE
 - I asked him, did u ever feel like switching to next company for better salary? – for this question I really get the best answer.
13. Out of 7,3 were given offer

OVERALL EXPERIENCE:

1. They tested communication skills, basic skill
2. More importantly they tested logical reasoning, how fast your brain tries to give the optimal solution
3. For that I suggest solving problems on **leetcode** and trying to solve it, it basically increases the problemsolving skills
4. When u read basic cs core concepts, make a **flashcard** or quick revision notes
5. So you can go thru It whenever needed
6. You should be learning **dsa+communication+core cs** for your placements

NOTE:

Always be ready for interview, because most of the time, you will be notified a day before or even early morning for the interview, you should be ready for interview anytime.

ALL THE BEST GUYS !!!

No Matter how many rejections you face, but always be sure that you learn something from your rejections.
