

# APPIAN INTERVIEW EXPERIENCE

**ROLE :** Software Engineer Intern

The interview process consisted of four rounds.

## Online Coding Round:

Time limit : 1:15 hrs

The Online Test consisted of 3 coding questions:

1. [Insert Interval - Leetcode](#)
2. [Find first and last position of element in sorted array - Leetcode](#)
3. [Find missing and repeating - GeeksForGeeks](#)

These problems were asked with slight variations in the problem statement.

## Technical Round – 1:

Time : about 1 hr

The round started with a brief introduction about myself. He asked in detail about everything I mentioned in my resume. He also asked in detail about the projects that I worked on and hackathons I participated in.

Related to my project and Web Development:

1. Challenges I faced during my project
2. Learnings during the course of the project
3. How JWT based authentication works?
4. What happens if someone between the server and client steals/modifies the token(MITM)?
5. How to prevent token theft in JWT authentication?
6. Have I deployed my project and how?
7. More things about Docker
8. How do you test your API endpoints?

Related to DSA:

He asked the coding language I was comfortable with and I was asked to write pseudocode in paper

1. Given a set of scheduled meetings(start time, end time), find if the meetings overlap or not?
2. Minimum number of rooms to accommodate all meetings
3. Given an integer n, can n meetings be conducted or not?

Related to DBMS:

1. Given a scenario for an e-learning platform , how to design a appropriate database schema?
2. Design a db schema for student and parent details in an educational institution.

3. Write a SQL query to find the siblings in the above schema
4. Some general db questions related to designing db schema.

He asked what I have been learning new in the recent. He asked if I have any questions. He explained all my doubts in detail and gave suggestions for me. He told a lot about working at Appian and how it would look like for me to work at Appian.

## Technical Round – 2:

Time : 15 min

For me, the interviewer did not ask any technical questions. He asked some general questions and a few questions related to my resume.

1. Brief introduction about myself
2. What do you know about Appian?
3. Why just Appian and not other companies?
4. Higher education?

I asked him some questions about Appian and that's it.

## Managerial Round:

Time : 10 min

He asked about things I mentioned in my resume. He enquired much about my academic performance and posted some general questions. I asked him some questions from my side and that's it.

## Tips:

- Be confident.
- It's fine to boast about yourself - that's what they expect.
- Practice regularly and that works.

Hope this helps :)
