

WELLS FARGO INTERVIEW EXPERIENCE (INTERNSHIP)

About the company:

Wells Fargo & Company is an American multinational financial services company with a significant global presence. The company operates in 35 countries and serves over 70 million customers worldwide. Today, Wells Fargo India operates in Hyderabad, Bengaluru, and Chennai. It is considered one of the "Big Four Banks" in the United States, alongside JPMorgan Chase, Bank of America, and Citigroup.

ONLINE TEST

APTITUDE PART (20 mins)

This round happened to be in the Aspiring Minds (SHL) platform. The round consisted of 3 sections namely verbal aptitude, business aptitude and coding. Both aptitude sections had MCQs which had to be answered compulsorily and free navigation was prohibited.

Verbal Aptitude: Consists of 12 MCQs to be solved in 15 minutes. They can be on vocabulary (guessing the meaning of the word as per the use in the sentence), comprehension, and some basic grammar corrections. It can be practised from sample questions given on the SHL website or other websites with questions of a similar pattern.

Business Aptitude: Consists of 15 MCQs to be solved in 20 minutes. Completely observation-based and logic-based. Basic mathematics and understanding of profit-loss using pie charts and bar graphs is sufficient to answer completely.

CODING PART

Two set of coding questions were asked

Driver code or function declaration was given for all the coding questions.

SET-1(45 minutes)

1. Write a function to find the longest common prefix string amongst an array of strings.

But the question wasn't direct, it was stated as a scenario and we must interpret it using the visible test cases.

Approach similar to: <https://leetcode.com/problems/longest-common-prefix/>

But some hidden test cases had spaces-which must be removed and the string was case sensitive-conversion was also required to pass all test cases.

2. Given an array Arr [], write a program that segregates even and odd numbers. The program should put all even numbers first in sorted order, and then odd numbers in sorted order.

Same question as this was asked: [Segregate Even and Odd numbers | Practice | GeeksforGeeks](#)

SET-2 (20 minutes)

1. Given an array of integers, return the sum of all integers using threads.

Similar to: [Sum of an array using pthreads - GeeksforGeeks](#)

Partial test cases do carry a weightage in score so try solving as much as test cases possible.

66 students were shortlisted for the physical interview held at CUIC

INTERVIEW

Pre-Interview Session:

Before the formal interview, a team of recruiters and HR professionals engaged candidates in an interactive discussion instead of a traditional PowerPoint presentation. The session focused on introducing the company and outlining expectations for potential interns.

Round 1:

Duration: 30 minutes

- The interview started with the interviewer reviewing my resume.
- The first question was a classic **"Tell me about yourself,"** where I highlighted my CGPA, projects, interests, and expressed my passion for the field.
- I was asked about a skill I had **learned on my own outside the curriculum,** and I mentioned **C++.**
- The interviewer asked why I chose C++, and I explained that since C was part of the curriculum, learning **C++ was a natural progression.**
- The interviewer inquired about the **differences between C and C++.**
- I was asked about the **pillars of Object-Oriented Programming (OOP)** and to explain each.
- I elaborated on the concepts, showcasing my understanding.
- I was asked to write **code for an abstract class** and explain its purpose.
- The interviewer questioned me about **data structures and how they are implemented in real life.**
- I provided examples such as **Stacks-Browser History, Priority Queues-Lifts** and **Graphs-Social Networking.**
- He questioned me about **static keyword in C++ and its associated data structure**
- I explained the concept of the static keyword in C++ and mentioned **stack** is used to implement it.
- He asked me to discuss about various **sorting techniques,** and I was asked about their **time complexities.**
- I was then prompted to **write code for an efficient sorting technique;** I chose **merge sort.**
- He asked me to explain the **Graph Traversal techniques,** and I explained them **with an example.**
- I was asked which is **faster** between Breadth-First Search (BFS) and Depth-First Search (DFS).
- I was asked to design and explain all the **use cases involved in an ATM machine.**
- I demonstrated a comprehensive understanding of **ATM functionalities** using diagrams and flow charts.
- Ended with the interviewer asking if I had any questions.

The round concluded with a positive note, advancing me to the next round.

Round 2:

Duration: 20 minutes

- The interviewer began by asking about **my aspirations** and sought **my unique selling points**.
- He presented real life scenarios that tested my **thinking capabilities**.
- One scenario involved making **multiple transactions** simultaneously using UPI, ATM card, and a cheque.
- Asked how I would **manage** the multiple transactions and what the balance would be afterward.
- I explained using a **lock mechanism** inspired by database management system (DBMS) transaction concepts.
- Discussed achieving a **tally** and explained that it can be done using a **log table** without accessing the original database.
- The round was characterized by a **focus on learning and understanding** rather than solely assessing.

Outcome: Successfully cleared Round 2.

HR Round:

Duration: 15 minutes

- Introduced myself and explained why I sought an internship at Wells Fargo.
- Highlighted strengths and weaknesses.
- Received insights into Wells Fargo's work culture.
- Interviewer shared personal experiences.
- Discussed stipend, workplace culture, and travel allowances.
- Gained information on these aspects.

Outcome: Successfully selected for the internship at Wells Fargo along with 20 students.

All the very best!!!
