

BARCLAYS

Barclays is a British multinational investment bank and financial services company. Apart from investment banking, Barclays organises personal banking, corporate banking, wealth management, and investment management.

Placement process consists of:

Round 1: Technical and coding

In this round there are 25 mcq's based on web programming, basics of C, C++, java. Each mcq is of 3 marks and there are 2 coding questions. (where 1 is easy and 1 is medium).

In first coding question I have passed all testcases where as in second one 11/20 are passed. Fortunately, I had shortlisted for other rounds.

Round 2:

In round 2 comprises of both technical and HR

Technical Round:

In this round, The interviewer asked to introduce myself. Then he moved to my current working projects he asked some questions like why you select this project, what is the use of this project to our society. Then, He asked me basics questions like what is static functions, variables, C preprocessors, macros and dangling pointers. DBMS concepts like Normalization, joins, ACID properties. OOPS concepts, About Sorting's, among the all sorting's which sorting is best and why, Time complexities of sorting algorithm, what are linked lists, how to insert and delete in linked list, their time and space complexities and others.

HR:

HR is only for 15 minutes. He asked me some questions like

1. Why Barclays?
2. How you are helping society in pandemic situation?
3. What is last book you have studied?
4. Main leads of the book, Genre of book?
5. What have you learned from that characters? which is your favourite character and why?
6. Do you have git account?

These were questions asked me in the Interview. The interview was around 45 minutes.

Topics to be focussed:

- Web programming (online test)
- Database Management
- Data structures

Take away:

Have a grip on basic concepts. Don't lose confidence.

Hope this helps.

Thank you and All the Best.
