

MathWorks Internship

Batch: 2019-2023

About the company:

MathWorks is an American privately held corporation that specializes in mathematical computing software. Its major products include MATLAB and Simulink, which support data analysis and simulation.

Number of Rounds: 4

- 1) Online Coding Round + Mcqs
- 2) Group Discussion
- 3) Managerial Round
- 4) HR Round

ONLINE ROUND:

Platform: HackerRank

This round consists of 10 Multiple choice questions from DSA, C,OS ,DBMS and 2 coding questions one of easy level and the other with medium difficulty. The total time given for both the sections was 60 mins.

Questions Asked:

- 1) Make all the array elements equal.
- 2) This was a medium level question related to arrays.

A total of 11 students were shortlisted for the next rounds.

The next day we had a PPT(Pre placement talk) at 8:30 a.m.

Note: Listen to the PPT carefully as many questions were asked from that.

Group Discussion:

Platform: Zoom

All the shortlisted students participated in this round.

TOPIC: Which is more important? Higher Education or Work Experience.

From 11 students only 2 of us were selected for the further rounds.

Note:

- I started the conversation which I think gave me an upper hand over my other friends.
- It is always necessary to stand on your point and not get manipulated by the opinion of others.
- My key point with which I proceeded in this GD - Both higher education and work experience are inter-dependent and they are not mutually exclusive.

Managerial Round:

This round lasted for about 30 -35 mins.

Platform: Zoom

The interview started with questions like

- Which is your favourite subject and why?
- My favourite project and what did I explore newly while doing that project?
- I was asked many questions from the PPT like , Name the products of MathWorks?
- Tell us something about the EDG program and many more
- What are your strengths and weakness?
- How are you improving your weakness?
- The interviewer then asked me a coding question related to stacks. I wasn't asked to code it . I gave my approach and then he asked me an optimized approach, I managed to give my approach.
- Finally the interviewer asked me to choose a branch for work (Bangalore/Hyderabad).

Note:

- Talk with utmost confidence.
- Have a nice big smile and positive attitude.

HR Round:

This round lasted for 10 – 15 mins.

Platform: Zoom

The interviewer greeted me and asked me general questions like tell me about yourself , Why MathWorks?, What do you know about MathWorks EDG program?, Which location did you select for your internship and why? And a few more questions. Finally she asked me if I had any questions. I asked her how did I perform and where should I improve as it was my

first HR interview. She said that I have attentively listened to the PPT and I was well prepared. She bid goodbye by saying looking forward to working with you.

Final Result:

On the same day around 8 p.m. I got to know that I was the only person from our batch selected for the internship at MathWorks.

To keep in mind:

- Prepare an introduction and speak clearly.
- Try to maintain a good rapport with the interviewer and show them that your excited to be there.
- Never lie in the resume.
- Have a thorough knowledge of what you've put in the resume.
- For coding practice from leetcode explore, gfg.
- Don't lose hope . Keep practicing and surely you will be selected by one of the companies.
- Read GFG's archives of internship experiences of that particular companies which will give us an insight of how the process flow will be.
