

APPLE SDE INTERN INTERVIEW EXPERIENCE (ON CAMPUS)

ABOUT THE COMPANY:

Apple India is a key market for the tech giant, reflecting the country's growing demand for premium smartphones and technology products. With a rapidly expanding middle class and increasing smartphone penetration, India presents a significant opportunity for Apple to expand its market share. The company has been actively investing in local manufacturing to comply with the government's "Make in India" initiative, producing iPhones domestically to reduce costs and enhance affordability. Additionally, Apple has launched its online store and is planning retail stores in major cities, further strengthening its presence in the Indian market.

JOB DESCRIPTION:

"We are looking for remarkable individuals with excellent communication abilities and strong interpersonal skills, who can collaborate effectively across diverse business and technical teams. The ideal candidate is a proactive, motivated individual with outstanding interpersonal skills and a flexible, positive attitude toward problem-solving. "

Overview of Interview Rounds:

1. Resume Shortlisting
2. Online test
3. Interview - R1 - Technical & Eliminary
4. Interview - R2 - Techno Managerial

Let's look about each round:

Resume Shortlisting:

In this round, all the candidates were shortlisted who don't have back papers.

Online Test:

In this round we were asked to do one coding problem.

- **Coding Question: (it is a leetcode question)**

Imagine you're playing a game where you need to cross a sequence of stones to reach the final stone at the end, and reaching it will save your life. Each stone has a number on it that indicates the maximum number of steps you can jump forward from that stone. Starting from the first stone, your objective is to determine whether you can make it to the last stone. Return true if it's possible to reach the last stone, otherwise return false.

Input:[2, 3, 1, 1, 4]

Output: 1

I/O Explanation:

You can jump 1 step from the first stone to the second stone, and then take 3 steps to jump directly to the last stone.

- **MCQ Questions:**

Total no of questions: 10

In this round the mcq questions related DBMS,OS,OOPS and DSA were asked .

- **Tips:** Read lot of mcqs in internet related to core concepts and practice coding in leetcode.

50 people were shortlisted for next round .

Interview R1- Technical interview & eliminatory

Platform: Webex and coderpad(for pair coding)

This round was conducted in online and we were asked about which time we will be comfortable to attend the interview. I was interviewed by a Senior Software Engineer. He was very gentle. He introduced himself and asked me to introduce myself. He asked the following things.

1 .Coding Question: (pair coding)

- **N-Queens problem:** <https://leetcode.com/problems/n-queens/description/>
- Given some code snippets and asked to analyse time complexity

2.Projects related Questions:

- Overview of all the projects in my resume
- Some technical management question(like how you managed conflicts, how your learning methodology will be

He finally asked if I have any questions for him, I asked some template questions

Tips: Be thorough about your projects in the resume(know them completely)

Around 35-40 were shortlisted next round

Interview - R2 - Techno Managerial

Platform: Webex

This round was also online. I prepared many managerial questions but the interview was very surprising.

2.Managerial Questions:

- He asked some management questions related to projects. They are as follows:

How do you manage conflict with your teammates ?

What are the challenges?

How well you think this project creates an impact?

3. Some Random Questions:

- Why do you like your college?

Tips: Our confidence and how we manage our things were tested. Be calm and answer honestly.

5 were selected for sde intern and I am one of them.

Thankyou!
