

About the Company

The Bank of New York Mellon Corporation, commonly known as BNY Mellon, is an American multinational Investment banking services holding company headquartered in New York City. It is by far the world's largest custodian bank and asset servicing company BNY Mellon is an investment company, which provides investment management, investment services and wealth management helping institutions and individuals succeed in markets all over the world.

Online Round (Coding)

Timing: 90mins.

The first round of selection process was Coding round. There were 4 coding questions with varying points based on their difficulty and no aptitude questions were asked in the first round. The platform used was Hackerrank. Out of these 4 questions, one was categorised as easy, two were medium and one was hard. Around 25 students were selected for next round based on their points they got in the coding round.

Round 2: Technical Round - 1

Timing: 30mins.

This round was conducted in Physical mode held at CUIC. It started with my self-introduction. Then the interviewer asked my resume and he asked me about my projects which I mentioned in my resume. I did a project on Machine learning most of the questions were asked form that project. No technical questions other than my projects were asked for me in this round.

Round 3: Technical Round -2

Timing 40mins.

In this round it started with my introduction. Then basic OOPs questions were asked, then he gave a situation and asked me to write SQL query based on inner join. After that one programming question was asked it was related to grouping anagrams in a given list of strings. After that he explained me what are all the technologies are used by the company and projects he is working on.

DSA problem related to: <https://leetcode.com/problems/group-anagrams/>

In this round, for the programming question and SQL query we were asked to write it in Pen- paper mode. So for some of the students 3rd round was conducted like a Hybrid one in which both Technical round-2 and HR questions were asked but for some students separate HR Round was conducted.

Round 4: HR Round

Timing 30mins.

This Round was conducted like having a casual conversation with someone. Because my interviewer asked me questions from the things happened in my Life like, the recent problem I faced in my life and steps taken to solve it and biggest achievement in my life and some of the basic HR questions were asked.

Finally, after completing all the four rounds of Interviews, Around 16 students were selected for the Internship.

TIPS

- Practice coding problems consistently from any of the platforms like Hackerrank, leetcode and try to attend contests in codeforces regularly.
- Have 2-3 Projects from different domain and especially from web development using Angular JS and a project using JAVA.
- Be Confident and be yourself while answering questions in Interview.
- Be strong in the basics of OOPs and DBMS.
- Be ready to answer the questions asked from your projects you mentioned in your resume.

All the best!!!
