

**About Company:**

Bank of America offers a range of financial services, including banking, investing, asset management, and risk management.

**About the role:**

They took us for a role Software Engineer. Domain will vary for respected team. All are informed after joining date. Training period is there. Through that we can learn that particular domain more effectively.

**Preparation Strategy:**

Have to be strong in **DSA CONCEPT ,SQL,OOPS,DBMS AND CODING**. Confident in yourself. Solve some Puzzle questions also. And be strong with your resume and projects. **SDE sheet is fine.**

**Placement Drive experience (online test, GD, technical and HR interviews):**

2 Coding questions asked for an online test.

First question I got in arrays. Sorry Question I don't remember.

Interview Mode : **Online**

**2 rounds****1. Technical Round:**

Questions based on DBMS, NOSQL AND OOPS.

**Coding question:**

Need to find the numbers palindrome or not. Then find which is largest.

**2. Tech +HR round:**

Need to solve a puzzle and Armstrong number question.

And Basic HR questions.

**All the Best!!!**

Please call me if any doubts.
