

Experience Document

Siva Vignesh S,

Barclays Bank.

About the company:

Barclays is UK based bank and its technological operations that backs the banking and other trading operations are carried out all over the world. It's headquarters is located in London, UK. In India, technological operations are carried out in Chennai and Pune.

About the role:

Barclays hired grads for the role of Graduate Technology Developer, which is mainly focused on software development including Full Stack, Java Development and so on.

Preparation Strategy:

The common placement preparation strategy should be enough for Barclays online test and interviews. Be sure to put projects that you are completely confident from start to end (Be ready to face end-to-end questions about the project).

Placement Drive Experience:

Initially, they conducted first round online test which included

1. Technical MCQ's (20 Qs apprx)
2. 2 coding question (both medium level)

Tips & Tricks:

1. Be sure to start Competitive Programming at the earliest – Platforms include but not limited to Leetcode, GFG, codeforces (contests) codechef.
2. Prepare resume with valid details and mainly the stuffs that you are really confident.
3. Participate in open online contests to pace up reaching solution
4. Never forget to mention your approach while thinking of a solution during interview and always state time and space complexity even if not being asked.
