

Interview Experience

Name: S.Koushalya

Reg No: 2018115051

Email: shonakya2000@gmail.com

Company: Citicorp Services India Private Limited

Citicorp's intern selection process contains three rounds. Eligible students are allowed to attend round 1. Based on round 1 performance, students were shortlisted for technical interview.

Round 1: Aptitude and Coding

It contains quantitative aptitude based on fractions, ratios and proportions, etc.. This round was conducted in AMCAT platform. There were two Coding questions.

Round 2: Technical Interview

Students who got shortlisted got a mail for the interview process. There were 2 interviewers who interviewed me. Interview was conducted in SmartMeet. (The link will be sent to mail)

The following questions were asked,

These were the Questions we were asked as far as I could recollect

- 1) introduce myself
- 2) walk through my resume
- 3) what are my interests
(I said machine learning)
I was asked why I liked ML
- 4) I was asked to explain the need for data structures and how they were used in real life
- 5) difference between jvm and jdk
- 6) what were my thoughts about cloud computing and its uses
- 7) about concepts of oops
- 8) how I used oops in projects I had done
- 9) why I wanted to work with citi

If our answers are based on understanding of concepts, it would be good

Round 3: HR round, I was asked how I spent the lockdown time (I had to say what I did other than academics related activities)

How I contributed to the society?
