

Internship Interview Experience – CITI

Shivaani S -2020115082

About the Company

Citigroup Inc. or Citi (stylized as citi) is an American multinational investment bank and financial services corporation headquartered in New York City.

Profile:

Mention all the recent projects, put courses if you have done any, keep the format of the resume simple and formal. Try to keep your resume to one or maximum to two pages.

Rounds OA(2 hours):

It consisted of 5 sections- Logical Reasoning, Mathematical Aptitude, Verbal Reasoning, Technical MCQs and 2 coding questions. The coding questions were:

- Print the trapezium pattern- <https://www.geeksforgeeks.org/program-to-print-the-trapezium-pattern/>
- Generate a 2d array with a given integer (increment each entry by 1) and print the product of that array with its transpose.

Eg: if 3 is given and n=2 and m=2

Then the matrix would be

3 4
5 6

I passed all the cases of the second question and 9/11 cases of the first question.

62 students were selected for the next round.

Technical Round (30-45 mins):

Questions were based on my resume, about my projects. Other basic questions like what is a data structure, give the application of a data structure were asked. I was also asked to write the code for finding prime numbers in an array (I wrote the code using the usual brute force approach and then was asked if any other ways can be used-it wasn't optimal). I was asked to describe the oops concepts. They also asked where I would want to see myself in the next five years and if I had any questions for them.

Know your resume thoroughly. Know the basic concepts of OOPS, OS and DBMS.

About 35 were selected for HR.

HR Round:

This round lasted only for 5-10 mins. The questions were very general – tell me about yourself, talk about your family, who is your motivator and what do you know about Citi.

23 students were selected for internship.

Know whatever you put in your resume. For basic concepts you can refer interview bit or geeksforgeeks for OS,DBMS and OOPS(like: <https://www.interviewbit.com/oops-interview-questions/>). For Coding: Leetcode, GeeksforGeeks,.

Look at the GFG archives before attending the interview or test for any company. It really helps. If you don't know the answer for a question, tell them your not sure or you don't know. Know about the company before attending the interview. Stay calm. Be prepared for HR questions like "why citi?","Your Strengths and weakness" and "what would you do when..." situation type questions.
