

THIRUMURUGAN K – INFORMATION TECHNOLOGY

SOFTWARE ENGINEER IN CONGRUENT SOLUTION PVT LMT

About the Company:

Congruent Solutions is a specialist technology solutions and outsourced plan administration service provider to the retirement industry since 2004.

Overview of the Process:

The overall process consisted of

- Online Assessment
- Online Aptitude Test
- Interview Round 1 (Technical) – in CUIC
- Interview Round 2 (managerial) – in CUIC
- HR Round

Online Assessment:

The online assessment was conducted via a Microsoft Teams meeting with a duration of 1 hour and 30 minutes. During the session, four questions were displayed, primarily focusing on flowcharts and instruction-based problems. Each question included several sub-questions. Candidates wrote their answers in a notebook and submitted them as a PDF document.

Online Aptitude Test:

The online aptitude test included questions on Object-Oriented Programming (OOPs), Database Management Systems (DBMS), Operating Systems (OS), Networking, and Node.js. The test had a duration of one hour, with approximately 60 questions.

Interview Round 1(Technical):

The technical interview lasted for approximately 30 minutes and was primarily resume-based, with questions focused on topics mentioned in the resume.

Interview Questions:

- Tell me about yourself.
- Do you know JavaScript? If so, which version or framework of JavaScript do you know?
- What is ReactJS?
- What are React Hooks?
- Explain useState and useEffect in React.
- What is PySide6?
- What is polymorphism?
- What are primary keys and foreign keys in databases?
- What is the most recent project you are working on?
- Do you have any questions?

Data Structures & Algorithms (DSA) Questions:

- Reverse a string using recursion.
- Reverse a string using a queue.
- Find the duplicate letters in a string.

The interview was focused on concepts and projects listed in the resume, ensuring a discussion aligned with the candidate's experience and expertise.

Interview Round 2(Managerial):

The 30-minute managerial interview focused on personal background, technical interests, career aspirations, and problem-solving abilities.

Interview Questions:

- Tell me about your family and technical interests.
- What is your dream career?
- What responsibilities have you handled in both technical and non-technical roles?
- What is your professional dream?
- What makes you happy in the IT field?
- What do you consider your biggest achievement in the IT field?
- Have you ever noticed any bugs in social media platforms or online applications? If so, what was the issue, and how would you fix it?
- Do you have any startup ideas?
- What challenges have you faced in your projects, and how did you overcome them?

The discussion emphasized problem-solving skills, innovative thinking, and career aspirations in the IT domain.

HR Round:

The HR interview was conducted online and lasted for 10 minutes, scheduled four days after the managerial interview.

Interview Questions & Experience:

- How was your previous interview?
- What other company interviews have you attended before?
- Why do you think you were not selected in those interviews?

After answering these questions, the interviewer remained silent for 3 to 5 minutes, asking the candidate to wait. This happened to all three candidates.

The interview concluded with a discussion about salary.

My Preparation Strategy:

To prepare for the interview process, I followed a structured approach focusing on DSA, computer science fundamentals, and coding practice:

- Data Structures & Algorithms (DSA):
 - Studied Striver's A to Z DSA Sheet and followed his YouTube channel for explanations.
 - Practiced LeetCode problems along with Striver's sheet for better problem-solving skills.
- Computer Science Fundamentals:
 - Referred to W3Schools and GeeksforGeeks for concepts related to Operating Systems, DBMS, Networking, and OOPs.

This preparation helped me build strong problem-solving abilities and a solid understanding of core technical concepts.
