

KATTU BAVA K S – INFORMATION TECHNOLOGY

About the Company:

GAVS Technologies is a global IT services and solutions provider specializing in AI-driven automation, cloud transformation, and digital innovation. With a mission to enhance business efficiency and resilience, GAVS offers cutting-edge solutions such as ZIF (Zero Incident Framework), an AI-powered predictive analytics platform that proactively prevents IT incidents. The company focuses on industries like healthcare, banking, and retail, helping enterprises accelerate digital transformation while optimizing operations and improving user experiences.

Overview of the Process:

The overall process consisted of

- An Online coding contest
- Interview Round 1 (Technical) – In Office
- Interview Round 2 (HR) – In Office

Online Assessment:

The online assessment for GAVS Technologies was structured to evaluate various skills essential for the selection process. It consisted of the following six sections:

This round went for 3 hours.

- 1) Aptitude – Assessed problem-solving and logical reasoning abilities.
- 2) Algorithmic Thinking – Evaluated the candidate's approach to problem-solving and algorithms.

- 3) Coding Questions (2) – Tested programming proficiency through two coding challenges.
- 4) Reading Session – Measured comprehension and reading skills.
- 5) Typing Session – Assessed typing speed and accuracy.
- 6) Speaking Session – Evaluated communication and spoken English skills.

Interview Round 1 (Technical) – Offline mode:

This round went for 40 to 45 minutes.

- The interviewer started by asking me to **introduce myself**.
- They asked me to **explain my project** and posed several questions related to it.
- They inquired about my **internship experience** and the work I had done during that period.
- They asked about my **area of interest**—whether I preferred **front-end, back-end, or non-tech-related domains**. I mentioned my interest in **front-end development**.
- I was given **logical thinking questions** and was asked to **solve them on paper**.
- They asked **React-related questions**, including:
 - **What are states and components in React?**
 - **What is Express.js?**
 - **Difference between SQL and MongoDB?**
 - **Why did you choose MongoDB?**
 - **How to retrieve data using MongoDB?**
- Finally, they tested my **basic programming knowledge** with a simple coding problem.
- The interview was focused on understanding my problem-solving ability, technical expertise, and familiarity with front-end technologies.
- Any questions for him?

Interview Round 2 (HR) – Online mode:

The second round of the interview at GAVS Technologies was the **HR round**, where they emphasized **communication skills** rather than technical knowledge. The interviewer mentioned that this round would involve **eliminations** based on communication proficiency and overall suitability for the role.

- The interview started with them asking me to **introduce myself**.
- They requested me to **explain my project** and talk about my **internship experience**.
- They clarified that **no technical questions** would be asked in this round, as the primary focus was on evaluating my **communication skills**.
- They asked me several questions about **GAVS Technologies**, including:
 - **What do you know about GAVS Technologies?**
 - **Why are you interested in this company?**
 - **What does GAVS do?**
 - **How much research have you done about the company?**
- They inquired about my **willingness to relocate** if required.
- They asked whether I would be comfortable working in **two shifts**:
 - **Morning to evening**
 - **Afternoon to night** (only in rare cases, based on urgent US client requirements).

- Additionally, they asked several **personalized questions about me** to assess my fluency, confidence, and ability to articulate thoughts effectively.

The HR round was mainly focused on **evaluating my research about the company, adaptability, and communication fluency.**
