

Company - IDFC First Bank

Company is a furiously developing titan in the Indian banking sector. It makes 94% of transactions via online. And anything u dont have to reach the bank you can solve it using their mobile app. The seniors tech guys are very very very very brilliant. So don't try to over-smart them.

Role - Application Engineering (aka sde/swe)

What u will work on / learn - golang, nodejs, docker, git commands, grafana, yaegar, jira, confluence, react native, test driven developments, principles of programming

Placement Drive experience:

I felt compared to other companies idfc was easy going in their interviews and tests, just know the basics of programming, be confident while explaining your projects, learn oops and dsa thoroughly.

Get to know details about their policies, slogans, ambassadors, mainly the CEO. this is a very aspiring bank so they expect you to be energetic and thirsty for knowledge

Tips and Tricks:

Try to use different programming languages based on the questions, for example for string base questions python will be easier to code, for dp based questions java or c++ is easy to code.

Just be confident in what you are saying, and if you say something wrong, learn to accept the fact and express it that you have learnt.

Preparation docs or playlists:

Learn oops , any material from the internet or even the 12th standard c++ oops book.
