

LOGITECH (6 MONTH INTERNSHIP)

Process:

- The entire process was held at logitech office(Olympia tech park,Guindy).
- There were 4 rounds totally.

MCQ (round-1):

- There were two types of MCQ (C++ and Frontend).
- Those who scored above 30 out of 50 were shortlisted next round.

Technical interview-1(Frontend):

- This round was entirely based on frontend projects.
- Since I have deployed a website, most of the questions were based on it.
- Then they asked to write some react and javascript codes for some functionalities of the website.

Technical interview-2(C++):

- In this round DSA was primarily focussed.
- Maximum subarray(Kadane's algorithm) was asked.
- Then they asked to explain the projects in my resume.
- Pascal's triangle along with time complexity was also asked.

HR interview

- Tell me about yourself.
- Explain non technical skills.
- Some HR questions like where do you see yourself in 5 years.
