

INTERVIEW EXPERIENCE

Name : Sri Akshya
Reg No : 2018115108
Company : Morgan Stanley
Month & Year : Sep 2020 (Internship)

Online Test: (Duration : 1hr 40mins)

3 sections:

1. Debugging questions
2. Aptitude
3. 3 Coding questions
 - a. Custom sort the given array
 - b. There are n railway stations, and a list of tracks which connects two stations will be given. Count the number of cyclic tracks present.
eg: a -- b, b -- c, c -- a is considered as a cyclic track.

Round 1: Technical Interview (Duration : 1hr)

- Basic questions about different data structures
- Real life examples of Graphs and Graph algorithms
- [Find the Kth smallest/ largest element in the given array.](#)
- Detecting cycle in directed and undirected graph
- Find the number of components in the graph.
- [Clone a linked list with next and random pointer](#)
- [Egg drop puzzle](#)

Round 2 : HR & Technical Round (Duration : 40 mins)

- Discussion on projects specified in the resume
- Behavioural questions
- Technical question : Find all permutations of the given array (with and without repetition of elements)
