

Ibrahim Navas S – NCR Voyix Interview Experience

About the company

NCR Voyix

NCR Voyix, formerly known as NCR Corporation and National Cash Register, is an American company specializing in digital commerce solutions with a 140 years heritage. In October 2023, NCR Corporation underwent a corporate restructuring, resulting in the creation of two independent companies: NCR Voyix and NCR Atleos. NCR Voyix focuses on digital commerce solutions, while NCR Atleos concentrates on automated teller machine (ATM) services. In August 2024, NCR Voyix announced a definitive agreement to sell its cloud-based digital banking business to Veritas Capital for \$2.45 billion.

About the Role:

The selected students are provided with a 6 month internship based on the candidate's performance, the intern will be converted to FTE. As a stepping stone for the technical career, the interns will be made to work with teams and the tech stack will be allotted based on the student's interview performance. The candidates should clock a working hours of 40 hours per week from Monday to Friday.

Overview of the Process:

The overall process consisted of

- An Online coding contest in HackerRank platform
- Interview Round 1 – F2F Technical interview (DSA, SQL, Full stack, Networks, OS)
- Interview Round 2 – F2F HR interview (Based on candidate's resume)

Round-1

- First round was an online test conducted in HackerRank platform.
- **Question Pattern:**
 - Coding Questions – 2 (1 Easy, 1 Medium)
 - MCQ – 30
 - SQL
 - Networks, Kubernetes
 - OOPS
 - OS
 - Git
 - Full Stack
- The test is completely proctored and is for a duration of 90 minutes.

- From the total of 200 candidates attended, 50 candidates were selected for the interview rounds.

Round-2

- First round of the interview was technical round, the panel will be of maximum 3 interviewers.
- This interview round will take **45-60 mins** depending on the panel.
- The candidate will be asked to give self-introduction and the following questions will be asked based on the introduction.
- For me, the topics covered during interview are:
 - One DSA question
 - **Question** – Check for a valid password without using Regex.
 - **Hint** – Make use of ASCII values.
 - One SQL query
 - **Question** – Given 2 tables employee and salary, select the name of the employee having the 2nd least salary from the salaries which are greater than the average salary.
 - **Answer** - `SELECT name FROM employee WHERE salary = (SELECT DISTINCT salary FROM salary WHERE salary > (SELECT AVG(salary) FROM salary) ORDER BY salary LIMIT 1 OFFSET 1);`
 - Prominent theoretical questions from DBMS including the difference between BASE, ACID, CAP, SQL vs MongoDB, NoSQL
 - Questions regarding OS including AndroidOS, iOS, etc.,.
 - Full Stack questions such as prominent Node commands, about package.json, Hooks and Props from React, etc.,.
- Always be bold and confident, express your areas of interest to the interviewer. 14 out of 50 candidates were selected for the next round.

Round-3

- Last round was HR interview, where a self-introduction must be given by the candidate with plausible proficiency.
- This interview round will take **30 mins** depending on the panel.
- One of your projects should be explained to the interviewer, it's to evaluate your communication skills.
- Make it as an interactive session with interviewer. Questions related to work environment will be appreciated.
- All the 14 candidates were selected in this round.

Tips for Preparation:

- Always be confident in what you know.
- Have a proper schedule which includes inter person communication training session.
- Be thorough with what you have mentioned in your resume.
- Practice DSA, DBMS regularly.
- Have theoretical knowledge in topics such as Kubernetes, C#, .NET, Git.
