

**ARUNA MANIVANNAN**  
**INFORMATION TECHNOLOGY**  
**OPTUM - Full stack Engineer**  
**(Technology Development Program Associate)**

**About the company:**

Optum, part of the UnitedHealth Group family of businesses, is a leading information and technology-enabled health services company serving more than 132 million consumers, delivering the right care when and how it's needed. We are dedicated to evolving health care so everyone can have the opportunity to live their healthiest life.

Optum, Inc. is an American healthcare company that provides technology services, pharmacy care services (including a [pharmacy benefit manager](#)) and various direct healthcare services.

Optum was formed as a [subsidiary](#) of [UnitedHealth Group](#) in 2011 by merging UnitedHealth Group's existing pharmacy and care delivery services into the single Optum brand, comprising three main businesses: OptumHealth, OptumInsight and OptumRx. In 2017, Optum accounted for 44 percent of UnitedHealth Group's profits. In 2019, Optum's revenues surpassed \$100 billion for the first time, growing by 11.1% year over year, making it UnitedHealth's fastest-growing unit at the time.

**About the Role:**

The Technology Development Program (TDP) at Optum includes a 4-week bootcamp followed by a 12-month development program which includes two 6-month rotations and Grade Placement at the end. As a TDP Associate, you'll gain invaluable experience in a variety of domains, as well as mentoring from technology leaders, networking across the technology organization and collaboration opportunities. The program creates a cohort structure that provides a more personalized employment experience in turn creating community and increasing engagement beyond that of a traditional hire. These roles include, but are not limited to analysis, design, coding, engineering, testing, debugging, standards, methods, tools analysis, documentation, research and development, maintenance, new development, operations, and delivery. With every role in the company, each position has a requirement for building quality into every output. This also includes evaluating new tools, new techniques, strategies; Automation of common tasks; build of common utilities to drive organizational efficiency with a passion around technology and solutions and influence of thought and leadership on future capabilities and opportunities to apply technology in new and innovative ways.

## **Overview of the process:**

ROUND 1:Online test on their platform

ROUND2:Technical interview

ROUND3:HR interview

The interview process took place for 2 days in offline mode.

## **Online Test:**

It consisted of 50 aptitude questions of 4 sections

(Cognitive-ability,cognitive-analytics,technological concepts,mathematical logic/critical thinking /problem solving skills ,and debugging)

and 5th section had 1 coding question—>

[State of the Art](#)—the question was something like this.

After completing the test, I was shortlisted for the interview which was scheduled on the next day.Around 80 were shortlisted.

They said like we have hr interview for round 1 and technical interview for round 2. But it was not same for all. Some had hr interview online in cuic itself, some had offline. On the same day, they had technical round too.

But for me, I had my technical round on that day of interview. They called me the day after for the hr round.

### **Technical Interview:**

The interview was held around 2 hours.

He asked to introduce myself and looked at my resume. Then he told me to explain one of the projects. I explained one of my full stack projects. He again and again asked on the objective of the project and why it was done. Then he asked about the tech stacks of the project and the difference between div and span. How CSS is applied to all the pages. He asked technical questions on HTML, CSS, and on JavaScript.

Then he asked my favourite subject. I told DBMS. He asked Why? I gave justification. So he gave me 4 tables and told to write queries. The queries included joins, group by, aggregate functions, minus, rownum, limit and offset and so on.

Then he asked another favorite subject. I said Data structures and algorithms. For that too he asked for justification. He gave 3 coding questions and told to write code. I remember only one, that was 3 sum problem. For that he asked 3 approaches, time complexity and comparisons. And also modified and said to tell approach if it has repeating numbers.

He asked why I like computer science. I said many reasons. So that he tested me by asking basic questions like how ctrl c + ctrl v works in a system. Then he asked how in offline mode, the bookmarks given by us are getting saved by google. He also asked how search system in VS code works. The answer he expected was Indexing. He asked some more questions like this and checked how curious I am to learn how things work in a computer since I use it in day to day life.

He also asked some HR questions like what if no Optum. How did I manage time in college and about the clubs I worked on.

He then jumped into Machine Learning project that I have put in my resume. He told to draw class diagram for that project. He then asked to explain the algorithms used and their justifications. He gave the same question that was given for sql queries and told to use any Tableau tool to visualize it in a best way.

I mentioned certificates in my resume. He asked questions on that.

He also asked about my another full stack project and justifications and some questions on the tech stacks.

He was friendly and had a nice interview experience.

## **HR Interview:**

The next day I was called for HR interview.

There were 2 interviewers.

They were friendly.

1.They asked for introduction.

2.They then asked about my achievements in my resume and what was that.

3.They asked about the clubs I worked on.

4.They asked whether I have an experience of mentoring anyone like juniors?

5.They asked about my project.

6.They asked how I managed the time between academics,projects and clubs and all.

7.I mentioned 6 certificates on my resume.He asked why I did then,and how I managed them.

8.They asked Why OPTUM?

9.They asked whether I am ready to relocate ,and are my parents ready to send me to other states.

10.They also said me to ask any question.

It took place for around half an hour.

## **TIPS:**

### TECHNICAL ROUND:

->DATA STRUCTURES AND ALGORITHMS,DBMS,SQL QUERIES,OOPS ARE VERY IMPORTANT AND ALSO OS AND CN

->Be confident.

->IF YOU DONT KNOW THE ANSWER,TELL LIKE I DIDNT BRUSH UP THE CONCEPT AS OF NOW OR I AM NOT SURE.FOR CODING QUESTIONS AND QUERIES,IF YOU CANT TELL THE PERFECT ANSWER,DONT TELL YOU DONT KNOW,TRY YOUR APPROACH AND BE CLEAR AND CONFIDENT.

->COMMUNICATE WELL.

### HR ROUND:

->CONFIDENCE IS THE KEY

->COMMUNICATE WELL BOLDLY

->GIVE CRISP AND SHARP ANSWER THAT WILL BE IMPRESSIVE AND UNIQUE TOO.

Don't get nervous.Never lose hope.Try and practice well ,and when your time comes,you will be succeeded.

ALL THE VERY BEST!!!!!!
