

Interview Experience

Name : Harinarayanan K S

Reg. No : 2018115034

Company : Searce

Month & Year : SEP 2021

Round 1 : (Online Test)

It contains general aptitude questions. 45 questions had to be solved in one hour.

Around 90 students were selected for the next round.

Note: The number of rounds varied from person to person.

Round 2: (Technical round)

This was a technical round where I was asked the following questions

- Real world applications of trees, graphs, linked lists, queue and stacks.
- Different software development lifecycles
- Purpose of cloud based applications with example

Round 3 : (Technical round)

I was asked to introduce myself, and then I started talking about my projects, and there were some project related questions asked. This went on for about 10-15 minutes. Then I was asked this puzzle https://en.wikipedia.org/wiki/Water_pouring_puzzle#Standard_example

Round 4: (HR)

This round also started similar to the previous rounds with introduction and projects. I was then asked about the tech stacks that I am familiar with and why I chose software engineer role.

Next I was asked if I had to decide a venue for a cricket match to be held and the profit had to be maximized, which venue would I choose and why? My answer to this was it would depend on who is playing the match. For example, if Dhoni is playing it would make sense to host the match at Chennai. The interviewer was satisfied with the response.

Round 5: (HR)

Again I was asked to introduce myself and talk about my projects and just basic HR questions like why Searce, and preferred location. Finally, I was told that I was selected by the HR itself.

All the rounds were of about 15-20 minutes.

ALL THE BEST!
