

Placement Experience

Name : Paavani M

Roll No : 2018115065

Company: Searce Inc

Rounds : 3 (Number of rounds varied from person to person)

Round 1: Online test

It contained 45 aptitude questions to be solved in 1 hour.

It consists of Quantitative, logical, and data analysis questions.

Round 2: Technical Interview (20 mins)

The interviewer was very friendly and asked me to introduce myself.

Interviewer asked me which data structure I am strong in. I told arrays and strings.

Then he gave me one coding question.

Then he asked me if I learnt any new technology in the past 6 months. I told ML because my recent project was based on ML. Then he told me to explain my ML project.

Round 3: HR round (20 mins)

He asked me one aptitude question.

Out of 200 fish in an aquarium, 99% are red. How many red fishes must be removed to make the percentage of red fishes to 98%?

I gave various approaches. He seemed satisfied with my thought process and then moved on to basic HR questions like why Searce, and preferred locations.

Tips:

Just be confident and keep a smiling face always during interviews.

Make sure you know about each and every word you mentioned in your resume.

Best of luck guys!!!
