

Interview Experience

Name: Ragul B

Reg No: 2018115084

Company :TCS Digital

TCS Digital contain two rounds

Round1: Aptitude & coding

In that first part verbal with 15 questions

Second part aptitude with 15 questions

Third part coding with 2 questions

In coding 1.insert space in between words

2.another one was based on permutation

Round 2:Technical ,MR ,HR

First round shortlisted candidates selected for interview . It was combined interview

Interviewers also so friendly .First I introduce myself and tell about my projects and they asked about frontend and backend parts it takes 10 mins.And asked preferred coding language and I tell java then they go with java

In that also 3 coding questions asked for me

1.amostrong number

2.tower of honai

3.find and remove duplicates in array

4.Write code snippet for java script

5.Implement google map api simple working

And some more technical questions

1.why you take node js(from my project)?

2.what is join and tell and code for left join?

3.Difference between sql and no sql?

4.Difference between unique key and primary key ?

5.What is cloud computing ?

6. What is database management systems and why?

Be strong with your project what you done it will helpful very much.

All the best.
