

RAM KRISHNA H S – INFORMATION TECHNOLOGY

- CCIBT INTERN IN WELLS FARGO

About the Company:

Wells Fargo is a major American financial services company headquartered in San Francisco, California, with significant operations across the United States. Founded in 1852, it offers a wide range of services including banking, mortgage, investments, and consumer and commercial finance. The company is known for its extensive branch network and ATMs, making it one of the largest banks in the U.S. by assets.

About the Role:

CCIBT – Commercial And Corporate Investment Banking Technology

Commercial and Corporate Investment Banking Technology (CCIBT) refers to the specialized technological infrastructure and solutions that support the operations of commercial and corporate investment banking services. This sector involves developing, maintaining, and enhancing software platforms, trading systems, risk management tools, and data analytics solutions that enable banks to manage complex financial transactions, investment portfolios, and corporate client relationships. CCIBT plays a critical role in ensuring the efficiency, security, and compliance of banking operations, especially in areas like automated trading, real-time data processing, and regulatory reporting. As the financial industry increasingly adopts digital transformation, CCIBT is at the forefront, driving innovation and enabling banks to remain competitive in a rapidly evolving market.

Overview of the Process:

The overall process consisted of

- An Online Contest
- Interview Round 1 (Technical) – in CUIC
- Interview Round 2 (Technical) – in CUIC
- HR Round

Online Contest:

The Online Contest consist of aptitude question and question based on English knowledge. The aptitude section consisted of simple aptitude questions, technical mcqs, etc. The 3rd section consist of three coding question. The company offered equal priority for all the three rounds.

Interview Round 1 (Technical):

The questions were general. The panel consisted of 1 member and there were several panels. Questions and their complexity depend on the panel. Some panel members even asked DSA questions.

- They had asked me about various aptitude and general knowledge question.
- One of the panel members asked my favourite language and favourite project.
I said Python is my favourite language.
- What's your ambition?
- Any questions for him?

Interview Round 2 (Technical):

- They started with my introduction and stuff.
- They had asked us explain our projects, the tech stacks used in it, etc.'
- Asked a question about performing sorting and asked to explain it about writing a program and explain it along with its complexity.
- And few small small questions here and there.
- Any questions for him

HR Round:

It went for around 15 – 20 mins. The HR introduced himself to me and it was like a casual talk.

- Tell me about yourself, hobby, projects, family, etc.
- Where did you study, how was your schooling days.
- Why do you choose wells fargo, etc.
- Any questions for him
