

Interview Experience Document - Wells Fargo **(Placements)**

- Ramya R [Batch 2020-24]

About The Company:

Wells Fargo & Company is an American multinational financial services company with a significant global presence. The company operates in 35 countries and serves over 70 million customers worldwide. It is a systemically important financial institution according to the Financial Stability Board, and is considered one of the "Big Four Banks" in the United States, alongside JPMorgan Chase, Bank of America, and Citigroup.

It is the fourth-largest bank in the United States by total assets and is also one of the largest as ranked by bank deposits and market capitalization. It has 8,050 branches and 13,000 automated teller machines and 2,000 stand-alone mortgage branches. It is the second-largest retail mortgage originator in the United States, originating one out of every four home loans and services \$1.8 trillion in home mortgages, one of the largest servicing portfolios in the U.S.[8] It is one of the most valuable bank brands. Wells Fargo is ranked 47th on the Fortune 500 list of the largest companies in the U.S.

In addition to banking, the company provides equipment financing via subsidiaries including Wells Fargo Rail and provides investment management and stock brokerage services. A key part of Wells Fargo's business strategy is cross-selling, the practice of encouraging existing customers to buy additional banking services. This led to the Wells Fargo cross-selling scandal.

Interview Experience:

Coding Assessment [Mode: Online Platform: SHL AMCAT]:

The online assessment contained the following sections:

1. **Quantitative Aptitude and Business Aptitude:** This section had a few questions on aptitude, logical reasoning along with a few business aptitude questions involving data and chart interpretation and analytics.
2. **Verbal Aptitude:** This section had questions testing our english, knowledge, vocabulary and general grammar.
3. **Coding Qs:** This section had 3 coding questions:

1. Array Based Question [Difficulty: Easy]

Given

A binary array **S[N]** indicating if a system in a network of N systems is up or not

And

An array **L[N-1]** indicating the lengths of cables to connect the systems to adjacent systems,

To find the minimum cable length needed to get the systems down to run by connecting cables to adjacent systems.

Solution: Write a simple efficient code to spot the down systems and calculate the minimum of the cable length required to

connect to the left-adjacent and right-adjacent system. Sum all the lengths and return the value

2. Graph Based Problem [Difficulty: Medium]

A problem that asks us to find the **number of islands** in a matrix of 0s and 1s that can be solved by simple **DFS**.

<https://www.geeksforgeeks.org/find-the-number-of-islands-using-dfs/>

3. Recursion Based Problem [Difficulty: Easy]

A direct question to solve the **Tower of Hanoi** problem. The direct simple **recursive code** to solve the problem answers the question.

Interview [Mode: Offline]:

Round 1: Technical Interview:

What Was Asked?

- Introduce yourself!
- To write the pseudo code to implement
 - a. Stack using queue
 - b. Queue using stack
- Storing book details - Design a simple data structure and justify why [Expected Answer : Key - Value Association Data Structures - hashmaps, dictionaries]
- Discussion of hashing, hashing techniques, collisions, collision handling, collision avoidance techniques
- Comparison of different data structures and their search complexities
- Moving to resume, Questions on Java features and how it is different from C++ [More than theoretical comparisons, he

expected me to talk in the POV of a developer and analyze how coding in Java is different from C++]

- Explain OOPs concepts with simple real world examples rather than technical definitions.
- In detail questions on the Summer Intern project with follow ups on the project workflow, its impact on the corporate systems
- Talk about your project : Parkinson's Disease Prediction Using Deep Learning - Techniques used, Future Scope
- System Design Question: To design a system to simulate google maps

Tips:

- Have a thorough understanding of data structures. Learn in the logic perspective more than memorizing pseudo codes and implementation.
- While writing pseudo code, make it clear and readable. Explain while coding.
- Be clear on whatever you mentioned on your resume. Any questions can be asked from technical skills, projects and experience sections.
- More than your ability to theoretically curate definitions and answers, you are tested on how well you understand concepts and whether you are able to clearly explain in layman terms.
- Keep bringing ideas and continue to communicate them, especially in the system design question.
- Answer system design questions in an end-to-end design perspective and not just the software and functional aspects.

Round 2: Technical + Managerial Interview:

What Was Asked?

- Introduce yourself!
- Talk about the project Sentiment Analysis on Mahabharata - Features, Use cases, NLP Techniques used, Deep Learning Algorithms
- Talk About the project - Parkinson's Disease Prediction Using Deep Learning - How is the disease detected? How to scale the work in real time to examine a group of people at a time and detect the disease instantly? How can such a work be used in Wells fargo?
- From resume, a discussion on Tensorflow - What is it? What features of it have you leveraged in the projects you have done?
- Talk about the project - IoT Based Smart Cart Using RFID - How it works? How can it be scaled?
- What are your short-term(2 years), mid-term(5 years) and long-term(10 years) goals?
- QnA to the interviewer.

Tips:

- This round requires more brainstorming than technical knowledge. Think dynamically and fast. Keep talking your ideas aloud. The interviewer will help you connect the threads.
- It is completely natural to get stuck. But keep telling aloud whatever you think. (I got stuck while answering the question: How can we use the Parkinson's Disease Detection project in Wells Fargo? - But I was able to gather ideas as I kept communicating my mind out)

- The interviewer was really interested in the projects mentioned in the resume and asked in depth about each of them.
- Project discussions demand you to think in a business and functional perspective.

Round 3: HR Interview:

What was Asked?

- Introduce yourself!
- Tell me about your family.
- Why did you choose to major in IT?
- What are your hobbies? How have they changed over time?
- What are the things you did in college apart from the academic arena?
- How have you contributed to society in your college life?
- Describe the kind of work you did as a Content Organiser in CTF. What impact does your work have on society?
- As part of the events team of CSAU, how was your experience? What do you do in CSAU? Did you achieve your club's motto of learning and spreading the knowledge of technology?
- How important is event management? What was a major challenge you faced while planning an event?
- What do you think is the key to crack your interviews? What mistakes did you make in your previous interviews? Did you correct them today?
- How was the transition in education and learning techniques during, before and after Covid? How did it impact you?
- How will you handle conflict of interests at the workplace?
- What is more important in building a career - money or knowledge?

- Where do you see yourself in 5 years?
- Why Wells Fargo? Justify with evidence how you found these about the company.
- What are the 2 reasons to hire you?
- What are the 2 reasons to not hire you?
- What are your expectations from Wells as a company?
- QnA to the interviewer - Do you have any questions about the company?

Tips:

- Keep calm and stay as natural as possible. Answer with confidence.
- Focus on how you improved as a person through college - in both the academic and co-curricular perspective.
- This interview can also be a test of your attitude and temperament. Don't be perturbed by how the interviewer is interacting. They may show disinterest and also try to contradict your ideas to gain different perspectives.
- Don't answer diplomatically. Have clear thoughts and take proper sides, but expect contradictory thoughts to your side. Even if it happens, try to not change your stand.
- Anything you say about the company, have supporting evidence as to how you got to know it.
