

CHRONUS

Don't try to answer all the questions, show them how you approach the problems!

My Advice:

1. Practice regularly on leetcode.
2. Don't be afraid to participate in competitions (losing is not humiliation)
3. Don't jump to conclusions while solving problems.
4. Get competitive not jealous
5. Don't give up
6. Maintain LinkedIn profile

Take away:

Have a Good Knowledge in all the core subjects – Data Structures and Algorithms, DBMS, OS, Networks.

Speak with Confidence.

Hope this helps.

All the best.
