

CITICORP

It is an American multinational investment and financial service company.

Round 1: Aptitude, Verbal and Coding questions

In this round we had 2 coding questions -one from graph and the other was pattern printing. Rest all questions were like general aptitude, verbal and logical questions. Indiabix site will be more useful to crack this round .Each section will have separate timers so try to be fast while answering.

More weightage was given to aptitude questions than coding questions, so try to solve maximum questions possible.

Round 2: Technical Interview

1. Tell me about yourself?
2. Detailed explanation of various projects in the resume?

While explaining about projects try to explain with some pictorial representation like ER-diagrams etc.

3. A puzzle question from geeks for geeks.
4. Basic concepts from OS,OOPS and DBMS.
5. Difference between structured and unstructured data.

Try to explain the concepts in layman point of view with real time examples.

Round 3: HR Interview

1. Tell me about yourself?
2. What I expect from Citicorp?

Then they opened up for questions, try to ask questions like how will be our learning curve in the company, technologies used in the company etc.

Topics to be focused:

- Database management system
- Object Oriented Programming

Take away:

Try to answer all the questions and never say I don't know or I forget, think and expose your approaches to the questions. Have a good knowledge in general scenarios, sql queries and coding questions.Be confident and cool.

Thankyou and All the very best.

With regards,

Sri Harini.K
