

SAMSUNG R&D INTERNSHIP INTERVIEW EXPERIENCE

About the company

Samsung R&D is a global research and development network integral to Samsung Electronics, covering a wide array of tech domains such as semiconductors, AI, and telecommunications. Its findings directly shape Samsung's product lineup, driving innovation in consumer electronics and infrastructure. Samsung invests significantly in R&D to maintain competitiveness. The outcomes of its research have a global impact, influencing technology evolution and contributing to various industries.

Total Rounds

- 1.) Online Assessment
- 2.) Technical Interview
- 3.) HR interview

1. Online Assessment

Total questions: 3 coding questions

Time: 1 hour

Note: Test cases are hidden, you cannot know whether your code works for all testcases. Also, you should write code covering all edge cases.

1. Next greater element

<https://www.geeksforgeeks.org/next-greater-element/>

2. Largest subtree sum

<https://www.geeksforgeeks.org/find-largest-subtree-sum-tree/>

3. Zigzag tree traversal

<https://www.geeksforgeeks.org/zigzag-tree-traversal/>

2. Technical Interview

Typical, tell me about yourself question

He asked some questions from the website I had hosted

I was asked some API related questions

Then, he started asking DSA questions

1) Next greater element with given set of digits

<https://www.geeksforgeeks.org/find-next-greater-number-set-digits/>

I told him brute force solution, he told me to optimize it. I wasn't able to optimize it. He moved to next question

2) Pop sequence

<https://www.geeksforgeeks.org/check-if-the-given-push-and-pop-sequences-of-stack-is-valid-or-not/>

This was an easy question, I was able to come up with a proper solution. Interviewer was also satisfied with my approach.

3) Egg dropping problem

<https://www.geeksforgeeks.org/egg-dropping-puzzle-with-2-eggs-and-k-floors/>

I have solved this puzzle before. So, I was able to answer this question without any flaws.

3. HR Interview

We were told we might have HR interview but we didn't have any HR Interview. We were selected directly after Technical Interview.

Verdict: Selected

Tips:

Samsung R&D gives much important to DSA. So, solve DSA problems regularly.

Make sure you have 2 to 3 good projects in your resume.

Prepare well on topic like,

- OOPS
- OS
- DBMS
- CN (basics)

Be confident while attending interviews.

PPO process is also different in Samsung R&D, contact me for further details.
