

KLA TENCOR

KLA develops industry-leading equipment and services that enable innovation throughout the electronics industry. They provide advanced process control and process-enabling solutions for manufacturing wafers and reticles, integrated circuits, packaging, printed circuit boards and flat panel displays.

Total no. of rounds: 5 (Online Test, Technical Interview I, Technical Interview II, Managerial Interview, HR Interview)

Eligibility Criteria: CGPA 7.5 and above

CTC : 18 LPA

Job Role Offered: Software Engineer

Round 1: Online Test

- Platform: HackerRank
- Difficulty level: Easy
- Duration: 90 minutes
- Number of Questions: 2
- Question 1: [Smallest Negative Balance](#)
- Question 2: A slight variation of [Sort Roman Numerals](#)

25 people were shortlisted for the technical interview

Round 2: Technical Interview I

- Platform: HackerRank Codepair
- Difficulty level: Medium
- Duration: 60 minutes

The shortlisted candidates were given codepair links to attend the technical interview. The interviewer asked to give a short introduction about myself. Make sure you prepare a nice and crisp introduction with a maximum of 1.30 – 2 mins. After that, I was given 2 coding questions to be solved in the CodePair IDE (1 Easy and 1 Medium). Don't just focus on typing your code, explain your thought process throughout and make sure that you get your interviewer understand your train of thought, so that even if you are stuck somewhere, the interviewer could give the required hints. Also, don't get nervous whenever you get stuck somewhere, always be bold and confident.

Coding Questions:

- [Divisibility of Strings](#)
- [Sum of all parts of square matrix after divided by its diagonals](#)

13 people were shortlisted for the next round

Round 3: Technical Interview II

- Platform: HackerRank Codepair
- Difficulty level: Medium
- Duration: 60 minutes

This round focused mainly on problem solving skills of the candidate. I was asked to explain the approach and write pseudo-code for 2 given problem statements (1 Easy and 1 Medium). Make sure you communicate as much as possible, it always plays to your advantage. Time complexities of each of the solutions were asked.

Questions:

- Convert an infix string to postfix, and evaluate the postfix expression.
- Given 'N' processes (execution time for each process is given in seconds) and 'C' cpu cores, where a process could depend on zero or more processes and compiles only after all the process it depends on finishes executing (no cyclic dependency). Schedule the processes and print the state of all the cores after each second.

6 people were shortlisted for the next round

Round 4: Managerial Interview

- Platform: Zoom
- Difficulty Level: Medium-Hard
- Duration: 60 minutes

This round was taken by a Senior Manager at KLA. It mainly focused on system design with some HR questions. I was asked to design an application that would take a script as input and execute it. There was no code involved, only the classes, and their corresponding responsibilities were asked, along with the usage of appropriate data structures used in each of the functionalities in depth. Some basic HR questions were asked in the end.

Round 5: HR Interview

- Platform: Zoom
- Duration: 25 minutes

Started off with basic HR questions, but the interviewer started questioning based on answers given to the previous questions. Make sure you research about the company well and prepare for HR questions beforehand so that you aren't caught off guard by any question.

4 of us were selected as FTE at KLA Tencor, Chennai.

Tips:

- It is highly recommended to restrict your resume to only one page and make sure it is devoid of any spelling/grammatical errors.
- While practising your DSA, give contests regularly in coding sites (Leetcode, CodeChef, GeeksforGeeks, etc.)
- Research the company well.
- Go through previous year interview experiences from geeksforgeeks.
- Its ok to start late, **now** is the best time to start preparing!

All the very best!
