

## Hubstream

It is a USA based Software Company started in 2013. It provides software platform for investigating crime. Adopted globally by law enforcement and corporations. Integrated workflows to improve productivity. Hubstream India incorporated in Oct 2018 and operational from first july 2019 in Chennai. For more details, visit [www.hubstreamsoftware.com](http://www.hubstreamsoftware.com)

### Number of rounds:

- Online test
- Group Discussion
- Technical interview
- HR
- Technical interview

### Online test:

The online test conducted in Google forms with proctoring consists of Logical Reasoning, Analytical, Coding section and a general passage writing.

For logical reasoning, many puzzles were asked. For this refer Geeks for Geeks Puzzle section, Interview puzzles and riddles by Logically yours in youtube for better understanding.

Time : 1 hour

### Group Discussion:

Title: Pros and cons of artificial intelligence and machine learning

Time: about 20 minutes.

### Technical Interview:

In this round, the following questions were asked.

Introduce yourself

Hobbies

Given a string, find whether it is anagram or not. (explained the code with workflow)

Given two strings and have to find one string is palindrome to another string or not (in efficient way.

This is solved by using dynamic programming)

Given an array, find the first positive missing number (two cases: The array contains only positive numbers.

The array contains both positive and negative numbers)

Time: about 1 hour.

### HR:

Introduce yourself

How do you spend time in lockdown

Questions from my resume (I have mentioned, I organised Deadlock opener event in our symposium. So questions like what is deadlock opener event and its rounds and real time example for deadlock were asked)

Explain about any machine learning project that you have done so far.

Any questions for you?

Time: about 15 minutes

**Technical Interview:**

This round is conducted with the CTO of Hubstream.

Introduce yourself and about family

Queue implementation using array with workflow and constraints( I have mentioned area of interest as data structures in my resume, so queue implementation is asked)

Any questions

Time: about 1 hour

**Topics to be focussed:**

Basic coding and its workflow

Data structures

Projects mentioned in resume

Having a good knowledge of basics, coding and confidence will help to be placed in this company.

Hope this helps.

Thank you and All the Best!!. Feel free to ask any doubts!
